MINES, MINERS, MINING

Croppings of Mining News Assembled From Various Sources.

IN THE CASTLE DISTRICT

Great Excitement by a New Discov ery-A Large Eody of Rich Ore on the Surface-Locations Filed.

From the Castle Tribune. Castle was greatly excited on Saturday last, when it leaked out that a great strike had been made on the hill on which the mine is located. In the fore part of that week Frank Kanenbly, while prospecting, made the discovery on the vacant ground lying immediately to the west of the Princess. On this hill has been found some of the richest float that has been picked up on the surface in this whole district. It was discovered by the men who first came here to prospect. For five years it has been a study with the mining men operating in this portion of the district to endeavor to locate this lead. They were all satisfied that some day on this hill there would be uncovered near to the surface one of the richest mineral ledges that has ever been disclosed near to this town. It was reserved to Mr. Kanenbly, this great honor. No one was better ac-quainted than he with this portion of this mining district. For months he made it a special object of study to discover from where this rich mining float came. For ages it lay exposed on the slope of this hill. When the last projecting pieces, by the action of the elements and the atmosphere, were separated from the parent ledge. It became covered completely with debris, so that no external sign remained on the surface of the ground that would indicate the place where that rich lead iay

in the Sherman and Princess. In the P. & K. a good ore body exists. Immediately after this great discovery was made, it was located and named the Ratler. At 18 inches from the surface the ore was found. At the place where the mineral was discovered, the loose ground and wash overlaying, that occu-pied a space of about 11 feet in width by about 15 feet in length was cleared away. It was found that the whole bottom of this large cavity is composed of rich car-bonate ore. Just what the extent of this body at present is, it is impossible at this writing to determine. This discovery has been examined by old and thoroughly experienced miners. They all agree that with its present showing it is simply immense. The like of which has never been seen in this district on the surface. Assays have been made of ore that was broken from the apex of this great mass which yielded 46 ounces in silver and 68 per cent, in lead. Frank Kanenbly has iceated in with himself in the ownership of this claim William Mc-Bride, E. Deceles and Michael Haniban,

concealed. On a number of mineral lo-cations that were made on this hill, a

On each of these claims were found veins in which rich ore was encountered in

bunches. Such were the discoveries made

amount of development work was done, in order to discover this great lead

While some of the chief owners of the Merrimac mine were prospecting on the surface of this location a few days ago a fine lead was uncovered. It is composed chiefly of oxide of iron. It measures about 8 feet. It is the intention at no distant day to sink on it. This mine has been worked considerably of late. A contract was let a few days ago to run a drift from the working shaft, which has at-tained a depth of 130 feet, at a depth of 70 feet toward the vein. It is calculated that in about 25 feet it will be struck.

Ore From the Southern Cross.

BUTTE, July 6.-Work was resumed at the Southern Cross mine this morning. Secretary Guy X Piatt of the mine has closed contracts with the Colorado smelter of this city and a Helena smelter to handle the ore. Accordingly the work of extracting ore has begun, and ore will for the drawing of the ore from the mine to Anaconda or Phillipsburg, from which places it will be shipped by rail to Butte and Helena. Some 40 teams will be re-quired to keep the ore cars filled.

STOCKS AND BONDS.

Ups and Downs in Market Values on the Stock Exchange

NEW YORK, July 7 .- The stock market continues to exhibit a strong undertone but develops no activity. The close was dull and barely steady, at generally insignificant changes for the day, slight advances being in the majority.

Government bonds, steady. Closing stocks:

Mysterious Mov. ments.
BUTTE, July 6.-Workmen digging a ditch out near the poor farm met with queer incident to-day. Two men, armed with a pick and shovel, came within a with a pick and shovel, came within a few rods of where they were working and proceeded to dig a hole. From the hole they took a box which they opened. The workmen could not see what was taken from the box, as the men went away with its contents toward the Bell smelter. It is thought by some that perhaps the articles were stolen in Butte the past few weeks and may have been cached there.

A big Grist of Business.

BUTTE, July 6—Between 20 and 30 prisoners were arraigned in the police court, all on minor offenses and were the court, all on minor offenses and were the result of the police round up since Friday evening. The sum of \$77.80 was paid to the clerk for fines and costs and eight commitments were issued. Quite a number of the prisoners still remain to be tried, having entered pleas of not guilty. The most serious offense charged against any of the accused was fighting and disturbing the peace.

NOTICE OF APPLICATION TO CUT TIMber,—in accordance with the provision of section is, rules and regulations prescribed by the
Homorable secretary of the Interior, May 2th,
1821, I, the undersigned, is en to be that at the
